

GEOSPHERE FROM GEOSMART

My daughter loves to build (and demolish) things. She loves Legos, blocks, anything that she can stack on top of each other until it's taller than her, she loves. My brother, cousins, and I would play Legos for hours, so I share her love of building, too. But there are so many new construction toys on the market today that I would have killed to have when I was younger. One of those toys is [GeoSmart](#), a magnetic construction toy, that is out of this world! I recently got the chance to review one of the GeoSmart sets and the whole family is in love with this amazing toy!

GeoSmart is a magnetic construction toy for children ages 5 and older (my daughter is 4 and she had no problem building with them). Each piece contains magnets that are protected by a double safety system, so the magnets can't fall off. A stainless steel covers the strong magnets and locked onto an ABS core, which is then covered by durable polycarbonate housing. This new patented system makes GeoSmart a safer and stronger toy that offers a long lifetime and are super easy to clean. GeoSmart offers several different shapes in 9 bright and colorful colors. You can use squares, triangles, diamonds, rectangles, isosceles triangles, and trapezoids to create endless combinations and let your imagination run wild. Some sets come with unique pieces like wheels, lights, or remote controls so playtime is limitless! Some of the special elements Geosmart offers are:

- Spinner: add motion to a simple construction. The spinner easily clicks onto every square piece.
- Wheels: use your imagination and build cars with 4 wheels or 6 wheels
- Tracks: build trucks with tracks!
- Train connectors: build trailers you can easily connect to your vehicle and drive it around.
- LED-Lights: light up your construction with one of the 6 LED colors. The panels easily click onto the squares and MORE!

We received the [GeoSphere](#) set that comes with 31 pieces, including one spinner, 12 triangles, and 18 squares. Each set also comes with a book with structures you can build or you can build something original. They're incredibly easy to build with and fun for everyone. My husband and I like to help our little one build more complex structures to get her little brain thinking. GeoSmart helps with spatial insight, hand-eye coordination, concentration, logical thinking, and allows kids to be creative. There are a lot of awesome sets to choose from, make sure you check them all out [here](#) and they can be purchased here on [Amazon](#)! I give GeoSmart 5 out of 5 stars. The sets are so fun and keeps my little one

engaged. I will definitely be buying more sets this coming holiday season. GeoSmart sets make a great gifts for all the kids in your life!

We love GeoSmart so much, we've teamed up for a giveaway! One lucky winner will win a [Solar Spinner](#) set from GeoSmart! Follow these quick and easy steps to enter:

1. Follow both @BurritoBuzz and @GeoSmartUSA on Instagram.
2. Like the Solar Spinner giveaway post.
3. Tag friends you think would like to win, too!
4. That's it!

The giveaway begins Monday, November 21st at 12pm EST and ends Wednesday, November 23rd at 12pm EST. The winner will be announced on the original giveaway post within 24 hours. Goodluck!
